Sustainable Floating Homes

Living by the water is a concept familiar to us all, but living on the water is something you don't hear about quite as often.

In Rotterdam's Nassauhaven, a disused harbour basin has been transformed into a floating residential street featuring no fewer than 18 sustainable floating homes: the Havenlofts.

A truly unique new form of living!

The Havenlofts are fully fitted with Novastruct RT 72 Reflex window and door systems.

“A truly unique new form of living!”

Here, wood and aluminium come together in beautiful harmony.
